

MANUSCRIPT CENTRAL™ OPTIMA

SIMPLIFY THE MANUSCRIPT SUBMISSION MANAGEMENT PROCESS WITH MANUSCRIPT CENTRAL OPTIMA

IMAGINE A SET OF TOOLS THAT BRING TOGETHER MANUSCRIPT CREATION, EDITORIAL REVIEW, AND REFERENCE CHECKING INTO ONE SEAMLESS PROCESS. DISCOVER MANUSCRIPT CENTRAL FOR YOURSELF!

Manuscript Central™ users will have a full set of valuable information resources and authoring tools for a complete workflow solution.

Manuscript Central Optima integrates elements of ScholarOne's Manuscript Central™ with Web of Science® and EndNote® from Thomson Scientific,

making it possible for authors to create their manuscript in EndNote and seamlessly submit it for review using Manuscript Central. Upon completion of all phases of this program, authors, editors and reviewers will be provided with tools to enhance each stage of the manuscript review process, leveraging the expertise of Thomson Reuters and the experience of the publishing community.

Manuscript Central Optima will also give reviewers and editors using Manuscript Central direct one-click access from the manuscripts to times cited, related records, and links to full record files in Web of Science, making the review process more efficient. New task-focused tools developed for Manuscript Central will interact in real time with the Web of Science, so editors can easily find reviewers and check references for completeness, and reviewers can place an author's new work in its entire research context with a single click.

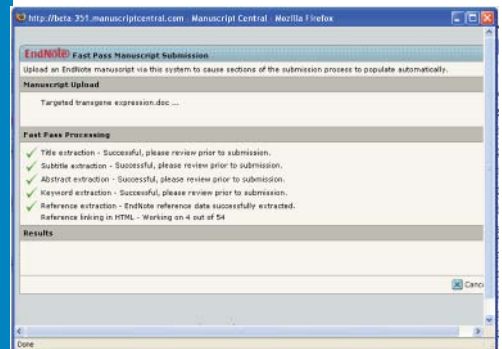

Authors access and upload EndNote generated manuscripts directly from web-based Manuscript Central.

Benefits to Authors

- Authors can populate manuscript submission fields from their EndNote template document with one Fast Pass click.
- Authors' workload is reduced and submission/reference accuracy is improved via use of FastPass submission into Manuscript Central.

Fast Pass manuscript submission automatically extracts key manuscript information for author validation, improving accuracy and reducing author workload. EndNote XML templates build linked references for more efficient online peer review.

Industry-Leading Support

- Project Manager Assignment
- Site-specific instructor-led training
- Abstract Central Online User Guide
- Live telephone assistance
3:00am - 8:30pm, EST M-F
- Email support
24x5, EST M-F
24 hour support at your event
provided at an additional charge

Benefits to Editors & Reviewers

- Editors can perform an integrated search of Web of Science for reviewers, invited authors, keywords and related records.
- Reviewers are provided citation linking and related records from EndNote bibliographies.
- Editors and Reviewers have access to Web of Science even when away from their institutional memberships.

Benefits to Publishers

- Publishers are provided linked references in XML format for quick and easy editing and exporting.
- Publishers receive manuscripts submitted in each journal's individual style, with references marked up and stylized forming for a smoother publication process.
- Publishers can provide access to Web of Science for all Editors and Reviewers even when they're away from their institutional memberships.

Manuscript Central™

Manuscript Central is an innovative, web-based, database-driven peer review and online submission application for scholarly publishers. Manuscript Central enables publishers to manage the submission, peer review, production, and publication process more efficiently, increasing their profile among authors, decreasing the time-to-market for critical scientific data, and lowering infrastructure costs. Manuscript Central also allows for easy administrative, editing, and reviewing capabilities. Manuscript Central supports over 200 societies and publishers, over 2250 books and journals and has over 5 million registered users, with 99.9% system uptime.

ScholarOne®

ScholarOne, a Thomson Reuters Business (scientific.thomsonreuters.com/scholarone) provides comprehensive workflow management systems for scholarly journals, books, and conferences. Its Web-based applications enable publishers to manage the submission, peer review, production, and publication processes more efficiently, increasing their profile among authors, decreasing time-to-market for critical scientific data, and lowering infrastructure costs.

Thomson Reuters

Thomson Reuters is the world's leading source of intelligent information for businesses and professionals. We combine industry expertise with innovative technology to deliver critical information to leading decision makers in the financial, legal, tax and account, scientific, healthcare and media markets, powered by the world's most trusted news organization. With headquarters in New York and major operations in London and Eagan, Minnesota, Thomson Reuters employs more than 50,000 people in 93 countries. Thomson Reuters shares are listed on the New York Stock Exchange (NYSE: TRI); Toronto Stock Exchange (TSX: TRI); London Stock Exchange (LSE: TRIL); and Nasdaq (NASDAQ: TRIN).
